

PV5 Cargo

Moving your business

Movement that inspires

Moving your business.

Kia Platform Beyond Vehicle is a business platform that integrates hardware, software and services to deliver a complete mobility solution. Kia PV5 marks a shift beyond transportation, offering purpose-built solutions for logistics, leisure, and a wide range of real-world needs.

Faster, smarter logistics for every load

Offered in Standard, Long, and High-Roof body types, this delivery solution adapts to your logistics needs — helping you move more, faster, and safer.

Exterior Design.

Side Design.

The PV5 Cargo's side profile blends vivid body color with flush glass graphics for a refined, modern look. It's clean design improves visibility and creates a spacious feel on the road.

Side protection for tough roads

Impact-resistant cladding along the sides helps absorb bumps and protect the body. It gives you added peace of mind when driving on rough or uneven roads.

Wide sliding door for easy access

A manual sliding door opens wide, making loading and unloading easier, especially in tight spaces.

Energy that works for you

Smart Charging

Take control of your energy use. Smart Charging dynamically adjusts charging based on real-time electricity prices, helping you reduce operational costs. (Limited by country availability and launch timing)

Power your tools from anywhere

V2L (Vehicle-to-Load) technology allows you to effortlessly power or charge your tools directly from the eLCV's battery—perfect for remote job sites, emergency response, or flexible business needs.

Interior design.

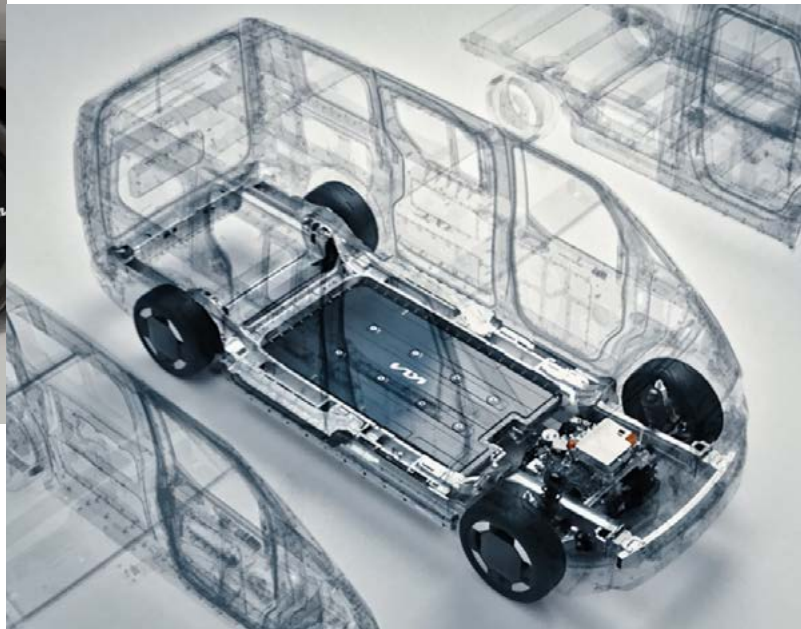

- Wide front view for safer driving
- Durable seating for daily use
- Quickly charge devices

The Kia PBV IVI (In-Vehicle Infotainment — Intuitive, safe, and always connected)

Enjoy smooth, smartphone-like control with AI-empowered voice recognition and a touch-friendly UI. From real-time navigation to smart vehicle settings and messaging, everything is designed to keep you connected and focused. With support for OTA (Over-The-Air) updates and scalable B2B features, the IVI system grows with your needs whether you're a driver or a fleet manager.

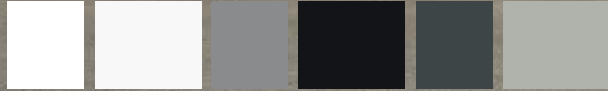

Smart Solutions

Built on the proven foundation of E-GMP.S

The Kia PV5 is based on E-GMP.S, a dedicated platform for optimized space and efficiency. Key components are pushed forward to create a spacious, flat-floor interior, while a system-based modular structure enables faster repairs and flexible configurations. Multi-frame safety and layered battery protection provide enhanced durability and occupant safety.

Colour Line-up.

Choose from six practical and professional color options designed to support your brand, boost visibility, and suit every business use.

The Kia PV5 Cargo
